INSTITUTIONAL STRATEGIC/ PERSPECTIVE PLAN: - Teaching and Learning: The pandemic Covid-19 has literally forced schools, colleges and universities across India, and the world indeed, to suspend physical classrooms and shifted towards use of technology in teaching and learning. In this sudden transition phase teachers, in majority have been grappling to adjust with the online ways of teaching and learning. Teachers first trained to use online platforms like Zoom, Google meet and e-content development. For the said year syllabus is conducted in online mode. In addition to lecture method, ICT based teaching and learning strategies are used. PowerPoint presentations are prepared by students. Participatory and interactive learning aids help the students to better learning. Students actively participate in Fieldwork, Study tours etc. To make teaching and learning process effective maximum faculty members should be motivated to use teaching aids in addition to classroom teaching. Students should have exposure to experiential learning. To realise these various types of activities such as visits, projects, exhibition, and competitions should be conducted on a regular basis. To incorporate various procedures for monitoring the student progress and thereby improving their performance. Preparation of academic calendar, teaching plans their implementation and verification.

The College Governing Council is the apex body. The Council meets at least twice a year and takes all major policy decisions regarding finance, infrastructure development, faculty recruitment and performance evaluation of teaching and non-teaching staff, research and extension activities, linkages, etc. The college strictly follows the service rules laid down by the UGC, State Government and Savitribai Phule Pune University.
